

SEND provision in our school.

At Tweedmouth Prior Park we are committed to providing a safe, stimulating and a caring environment where each pupil is valued as an individual and can develop his/her full potential. We have high aspirations for the achievement of all pupils. We provide provision based on careful analysis of need, close monitoring of each individual's progress and a shared perception of desired outcomes. We believe that early detection of Special educational Needs (SEN) is essential and that support is put in place for any child that needs it. We evaluate the effectiveness of provision at all levels in helping to improve opportunities and progress for our learners.

We follow the Northumberland graduated approach for further information visit <https://www.northumberland.gov.uk/Children/Northumberland-Local-offer-SEND-0-25-years.aspx> or refer to our school SEND Information Report on the school website.

Developing close relationships with our parents is paramount and we seek the views and knowledge that parents have about their child to help tailor the learner and to provide opportunities to suit their child's needs.

We offer a range of provision /strategies to help support our children who have SEND and we work closely with outside agencies such as the behaviour support team and the speech, language and communication service.
